Chaitanya Ahuja

5719 Gates and Hillman Center – Carnegie Mellon University

✉ cahuja@andrew.cmu.edu • 🖥 www.chahuja.com • ⊕ chahuja

Education

Carnegie Mellon University   **Pittsburgh**
Ph.D. in Language Technologies   *Aug 2015 – Present*
Advisor: Louis-Philippe Morency

Indian Institute of Technology, Kanpur   **Kanpur**
B.Tech. in Electrical Engineering, 9.5/10   *Aug 2011 – May 2015*
Minor in Artificial Intelligence

Research Areas

Pose generation, Multimodal Grounding, Multimodal Representation Learning, Speech Processing and Synthesis, Structured Prediction, Spatial Audio

Research Experience

Carnegie Mellon University, Prof. Louis-Philippe Morency   *August 2015 – Present*
Language2Pose: Natural Language Grounded Pose Forecasting
  ○ Designed an algorithm to learn a joint embedding of natural language and 3D body pose.
  ○ Trained a model with a curriculum based approach to generate animations from this joint embedding conditioned on natural language.
  ○ Demonstrated empirically that using SmoothL1 as the loss function can help with the robustness of training and generalization over unseen data.

Lattice Recurrent Unit: Improving Convergence and Statistical Efficiency for Sequence Modeling
  ○ Designed a recurrent unit (a.k.a. Lattice Recurrent Unit) which creates a distinct flow of information along time and depth dimensions allowing for **training of deeper models**
  ○ Compared it and demonstrated **improvements on language modeling** as compared to SOTA recurrent units on metrics: accuracy, computational convergence, and statistical efficiency
  ○ Demonstrated that decoupling information along depth and time shows significant improvement in all the aforementioned metrics

IIT Kanpur, Prof. Rajesh Hegde   *Aug 2014 – May 2015*
Final Year Project: *Source Separation using a Complex Matrix Factorization approach for Joint Modeling of Magnitude and Phase* [arXiv]
  ○ Proposed a new algorithm to **jointly model magnitude and phase** while matrix factorization
  ○ Reduced the Complex Matrix Factorization (CMF) problem to a simple Non-Negative Matrix Factorization (NMF) problem by simple transformations
  ○ Justified the algorithm's effectiveness by comparing against state of the art source-separation methods
  ○ Demonstrated that accurate phase reconstruction resolves unwanted artifacts in the reconstructed speech signal

IIT Kanpur, Prof. Vinay Namboodiri   *Aug 2014 – May 2015*
Final Year Project: *Visual Summarization of foreground object motion using boundary initialization of object tracking* [tech. report]
  ○ Proposed an online system for creating **human-centric image summaries** of **surveillance videos** which is based on Kernel-based tracking for automated live synthesis of video synopsis of surveillance videos
  ○ Initialized foreground objects based on locally varying blob-detection algorithm
  ○ Clustered tracks based on time and space to prevent occlusion in the summary
  ○ Video Summary was synthesized by placing objects, equally spaced in time, on the background

Selected Honors and Awards

- **Summer Undergraduate Research Grant for Excellence** (SURGE) 2013, IIT Kanpur
- One of the top 7 projects (out of 70) **in SURGE 2013**
- **Academic Excellence Award** for distinctive performance in terms 2011-12, 2012-13.
- **All India Rank 231** - **Top 0.05%** (amongst 4,75,000 students) in IIT-JEE 2011.
- **All India Rank 124** - **Top 0.05%** (amongst 10,00,000 students) in AIEEE 2011.

Teaching and Professional Activities

Reviewer Empirical Methods in Natural Language Processing (EMNLP)		*2019*
Reviewer Association for Computational Linguistics (ACL)		*2019*
Teaching Assistant Structured Prediction for Language and Other Discrete Data (CMU 11-763)		*Spring 2018*
Teaching Assistant Advanced Multimodal Machine Learning (CMU 11-777)		*Spring 2017*
Reviewer International Conference on Learning Representations (ICLR)		*2017*
Reviewer NIPS Workshop on Multimodal Machine Learning		*2016*

Internships

Facebook Reality Labs, Shugao Ma   *Summer 2018*

Human Communication Dynamics (Under Review)

- In a dyadic conversation setting, designed a model to generate upper body animations conditioned on the avatar's speech, pose history and interlocutor's speech and pose history.
- Used an attention based model to focus on interpersonal and intrapersonal dynamics as and when indicated by the stimuli to the model.
- Demonstrated the model's effectiveness in generating accurate and natural looking pose sequences via various objective and subjective metrics of evaluation.

Cornell University, Prof. Tsuhan Chen   *Summer 2014*

Prediction of Adjectives for given Nouns using Probability distribution of adjective-noun pairs and adjective-adjective similarity

[tech. report]

- Designed a system to **predict adjectives** for a given noun based on an existing set of tags, which increased the vocabulary of the tags while maintaining the sanctity of the noun-adjective pair
- Incorporated a Sentence Corpus (British-National-Corpus) to improve the compatibility of adjective with respect to nouns based on a probability measure
- **Removed redundant data** from the sentence corpus using a hash table which increased accuracy as compared to the baseline

IIT Kanpur, Prof. Rajesh Hegde   *Summer 2013*
On-Line modeling of the Pinna for Computation of HRTF's in Rendering 3D Audio
  ○ Explored relations between structure of a ear and Head Related Transfer Functions (HRTFs)
  ○ Worked towards mimicking a ear with digital filters to synthesize **Spatial Audio**
  ○ Developed methods to verify ear contours generated by spectral notches of HRTFs, hence mapping HRTFs to the anthropometry of the ear.

Selected Course Projects

Deep RL and control   *Jan 2017 – May 2017*
  ○ *Segmentation Models for NLP tasks with RL* [tech. report]
  Segmenting sentences into useful phrases for tasks like Machine Translation and Summarization

Statistical Machine Learning   *Jan 2017 – May 2017*
  ○ *Topological Data Analysis* [tech. report] [presentation]
  Analysing confidence intervals in cluster trees to facilitate pruning of low-confidence branches (or leaves)

Multimodal Machine Learning   *Aug 2015 – May 2016*
  ○ *Video Captioning* [tech. report]
  Generating descriptive captions for movie video segments.

Skills

  ○ Languages: Bash, C, CSS, HTML, LATEX, Make, Python
  ○ Frameworks: Numpy, Pandas, Pytorch, Scipy, Scikitlearn, Tensorflow, Theano
  ○ OS: Linux, OSX

Graduate Coursework

  ○ Deep Reinforcement Learning (CMU 10-703): R. Salakhutdinov, K. Fragkiadaki   *Spring 2017*
  ○ Statistical Machine Learning (CMU 10-702): L. Wasserman, R. Tibshirani   *Spring 2017*
  ○ Deep Learning (CMU 10-707): R. Salakhutdinov   *Fall 2016*
  ○ Intermediate Statistics (CMU 10-705): L. Wasserman   *Fall 2016*
  ○ Advanced Multimodal Machine Learning (CMU 11-777): L.-P. Morency   *Spring 2016*
  ○ Machine Learning (CMU 10-701): T. Mitchell   *Spring 2016*
  ○ Human Communication and Multimodal ML (CMU 11-776): L.-P. Morency   *Fall 2015*
  ○ Algorithms for NLP (CMU 10-702): C. Dyer   *Fall 2015*
